# SRIPAD SIRIKONDA

US Citizen · Chicago, IL · sripadsirik@gmail.com · linkedin.com · github.com · website

## Summary

Software engineer and ML practitioner with experience delivering GenAI mobile apps to 10+ clinics, scaling pipelines to 100K+ daily events, and building ML systems recognized in hackathons and academic research.

## Education

**University of Illinois Chicago (UIC)** *Expected May 2026*
B.S. in Computer Science GPA: 3.71/4.00
*Relevant Coursework:* Data Structures & Algorithms, Systems Programming, Machine Learning, Computer Vision, Databases, NLP, AR/VR, Personal Finance, Machine Organization, Data Science,

## Skills

**Languages:** Python, Java, JavaScript, C++, C, SQL, TypeScript, React, Next.js, HTML/CSS
**Backend/Frameworks:** Node.js, Flask, REST APIs, LangChain, SpringBoot
**Cloud/DevOps:** Amazon Web Services, Google Cloud Platform, Firebase, Docker, Kubernetes, CI/CD, Linux, Git
**Data/ML:** TensorFlow, Scikit-learn, PostgreSQL, DynamoDB, Redis, ChromaDB, Power BI, DataBricks
**Core Competencies:** Full Stack Development, Backend & APIs, Microservices, Distributed Systems, Data Pipelines
**Soft Skills:** Communication, Mentorship, Problem Solving, Cross-functional Collaboration

## Experience

**Family Eye Physicians** — AI Engineer Intern Oak Lawn, IL *2025–Present*
- Delivered GenAI React Native apps to **10 clinics**, digitizing workflows and driving faster adoption.
- Deployed **Meta's LLaMA 3** models which improved staff response time and patient data processing efficiency by 30%.
- Built a streaming ETL pipeline for **100K+ daily events**, automating KPI reporting and **saving 20+ staff hours/month**.
- Engineered CI/CD for 3 zero-downtime releases/day, **reducing manual labor time 96% (2h → 5m).**

**SWIM Research Labs, UIC** — Undergraduate Researcher Chicago, IL *2024–Present*
- **Boosted water-infrastructure efficiency by 35%** and cut resource waste 15% via Bayesian optimization + WNTR.
- Ran **10K+ simulations**, cutting processing time 30% and enabling daily model retrains.
- **Improved contamination-alert speed by 40%** and accuracy 25% on urban networks.

**UIC Undergraduate Student Government** — Software Engineering Intern Chicago, IL *2024– 2024*
- Launched chatbot + meal-plan donation platform **serving 40K+ students**, improving accessibility to resources.
- Owned backend/frontend updates to portal, reducing page-load time and **improving reliability for 40K+ users**.
- Collaborated with execs across 50+ meetings, translating policy goals into product specs + delivery timelines.

**Chicago Saranam Yatra Organization** — Apple/Android Software Developer Aurora, IL *2023 – 2024*
- Scaled React Native booking app to **1K+ monthly users** and **600+ appointments/month** with 99.9% uptime.
- Reduced Firebase data-access latency 50%, enabling real-time bookings.
- Improved UX reliability by profiling and fixing performance bottlenecks.

## Projects

**Tesla Battery Optimizer** — Python, React, LangChain, Llama3, AWS *Mar 2025*
- Forecasted state-of-charge with **95% accuracy** across **500+ modules**, cutting charging time **15%**.
- Built data + inference pipelines with anomaly detection, **reducing service costs 20%.**

**bouncE for Fulcrum GT — Paper Trading Platform** — React, Firebase, Python *Feb 2025*
- Processed **5K+ simulated trades/month**; delivered AI insights; won **2nd place at SparkHacks 2025**.
- Integrated **Google Gemini** as an AI trading assistant, enabling real-time insights that **increased user engagement by 25%.**
- Designed secure account flows + data pipelines, **scaling to 100+ active users** with zero downtime.

**NASA Planetary Seismic Detector** — Python, TensorFlow, PostgreSQL *Nov 2024*
- Detected **850+ seismic events** across **1,200+ hours**, improving accuracy **30%** and reducing telemetry **70%**.
- Built modular ML pipeline integrating Apollo & InSight datasets, enabling reproducibility and extensibility for future missions.
